

NKSC Lifesaving Rates for Canines & Felines

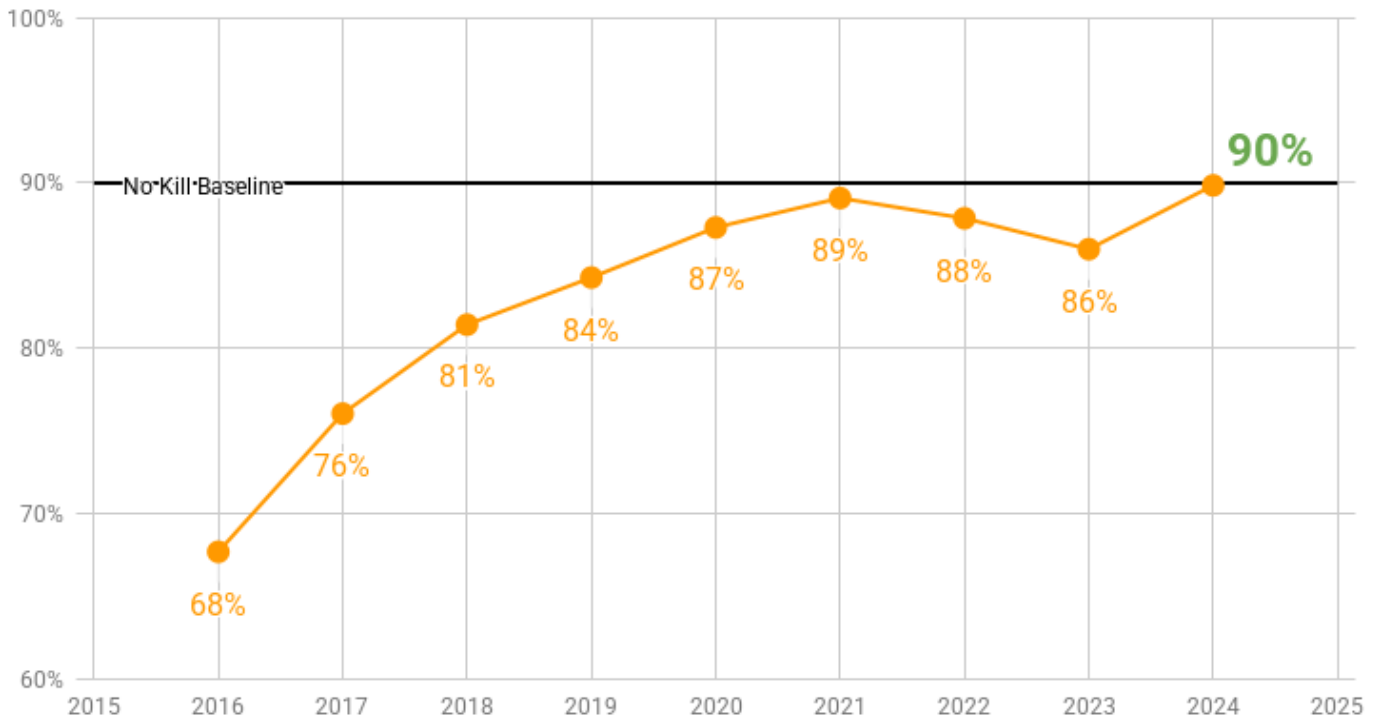

These statewide maps show the progress made by No Kill South Carolina (NKSC) between 2016 and 2024. Counties in dark red were saving less than 60% of animals, while counties in green were saving more than 90% of animals. As the graphic shows, more of the state than ever before is turning green, thanks to NKSC lifesaving initiatives.
